

SCHOOL OF HEALTH AND MEDICAL PROFESSIONS

The School of Health and Medical Professions (SHAMP) was established in 2024 to address the health care needs in Idaho and beyond. SHAMP was founded on a mission to improve access to health care for Idahoans by developing more graduate-level health care education programs.

Through a combination of research and class instruction, SHAMP acts as an educational pathway to train students in health care professions and fill critical industry shortages. With in-person, hybrid, and asynchronous degree options, SHAMP is accessible to practicing professionals, career-changing adults, and health profession students. Students will graduate fully equipped for an impactful career in medicine and ready to spark change in the field of health care.

Graduate Programs

- Anatomical Sciences (D.A.S.) (<https://catalog.uidaho.edu/colleges-related-units/graduate-studies/school-health-medical-professions/anatomical-sciences-das/>)
